

SleepKnit™ Smart Sheets

The SleepKnit™ Smart Sheet is a 4-way knitted bottom sheet from MIP, designed for healthcare beds with the needs of both patient and carer in mind.

MIP's SleepKnit™ Smart Sheet is a knitted sheet with multi-directional stretch which, unlike conventional woven sheets, means that this one sheet will fit the vast majority of healthcare mattresses, ranging from standard profiling beds to beds with dynamic airflow/pressure reduction mattresses.

Smart Sheets are constructed from a unique knitted design which is much softer than conventional woven sheets and therefore improves resident's comfort. Available in two versions: polyester (flame retardant) and poly cotton.

Full SleepKnit™ System Includes

Benefits of SleepKnit™ Smart Sheets

- Fitting is quick and easy.
- Latex free and no elastic.
- The stretch and large overlay ensures its fits most mattresses including profiling and pressure reducing.
- Doesn't require folding or ironing.
- Does not ruck like conventional sheets, improving comfort and reducing the number of times the bed needs to be remade.
- 4-way stretch of the Smart Sheet won't allow sliding or repositioning increasing compliance of using slide sheets.

The SleepKnit™ Smart Sheet are efficient in the washing process, bringing time and energy savings to laundries.

A great improvement on the loose cover sheets, which slipped off everytime the bed angle was raised and lowered. The fitted sheets stay on no matter how often the head is raised and lowered.
